

Nor-Tech's CentOS 7 EOL Strategic Transition Plan

We want our clients to rest assured that we have a plan in place to safely and smoothly transition new and existing HPC clients from CentOS 7 to a strong alternative. Although CentOS 7 updates and security patches will end June 30, 2024, there are currently good alternatives, such as Rock Linux, which has been authorized by the Open HPC community. We are monitoring rockylinux.org/, following direction from the OpenHPC steering committee and will continue to base our strategy on advice from recognized authorities and our own world class team of open source engineers. We are currently benchmarking Rocky Linux along with other alternatives. Please do not hesitate to reach out to us with any questions or concerns.
